

# NSC-100 IMMUNITION™ EXTRA STRENGTH - MG Beta Glucan – 10 mg

The extra strength microparticulate MG Beta 1,3/1,6 Glucan in NSC-100™ nutritionally delivers maximum potency and superior potentiation of the immune system. The result is faster response and effectiveness in nutritionally enabling the body to fight back to good health when compromised, acting inappropriately (autoimmune) or hyper (allergies).

A peer-reviewed article in "Letters in Applied Microbiology" concludes nonaggregated microparticulate beta glucan (MG glucan) in 10 mg doses has "superior immune potentiation." MG Beta 1,3/1,6 Glucan extracted from yeast cell wall is an immune response potentiator supported by science.

The MG Beta Glucan in NSC-100™ is micronized to an extremely small microparticulate particle size and processed to assure non-aggregation, to provide greater ingestion and nutritional immune potentiation by the macrophages. The macrophages are the primary white immune cells that fight health invaders such as fungi, viruses, bacteria and parasites plus toxins.

Beta Glucan is proven to nutritionally empower the immune response to nutritionally fight back against the negative effects of radiation and free radical damage to our arteries, skin and cells. The MG Beta Glucan in NSC-100™ also is a powerful "adjuvant," or substance that makes other formulations, including antibiotics, more effective in smaller doses when ingested together (www.betaglucan.org has research under the "adjuvant" category).

The MG Beta Glucan in NSC-100™ has enhanced antioxidant properties, but no anti-oxidant negatives, in 10mg capsules. Extremely large dosages are not necessary for this incredible product that nutritionally supports well-being and a quality as well as extended life by potentiating the immune response to successfully fight back against the assault of ill-health invaders on our systems that contribute to aging. When maximum strength Glucan is needed, NSC-100 Immunion™ is the answer.

Product	Description-UPC Code	Retail Price
NSC-100 30 Capsules-10 mg	6 08537 10100 1	\$69.95
NSC-100 60 Capsules-10 mg	6 08537 10106 1	\$94.95

## NSC-100 IMMUNITION™ Extra Strength 10 mg -Supplement Facts

Suggested Use: As a dietary supplement, take 1 capsule per day

Serving Size: One hard gelatin capsule

Servings per Container: 30 / 60

Ingredient	Amt per Serving	% Daily Value	Nutritional Ingredient Benefits
Beta-1,3/1,6-Glucan (micronized saccharomyces cerevisiae)	10 mg	*microparticulate extract from bakers yeast cell wall	Nutritionally potentiates the immune response orally through the macrophage immune cells and in turn the T, B and NK cells.  Nutritionally aids through immune cell potentiation in minimizing potential negatives from chemotherapy and radiation, promotes free radical scavenging and ingestion with disposal of toxic microbes

\* % Daily Value not established

\* Other Ingredients: Inulin, Gelatin & vegetable derived Magnesium Stearate

### NSC-100 IMMUNITION™ Extra Strength 10 mg - Nutritionally Supports an Enhanced Immune Response, Including:

- Micronized 10 mg of Beta Glucan for Nutritional Potentiation and Modulation of the Immune Response through Oral Supplementation
- Nutritionally Aids in Minimizing Negatives from Radiation and Chemotherapy
- Promotes Free Radical Scavenging and Phagocytosis (ingestion and disposal) of toxic microbes by white immune cells
- Nutritionally contributes to Normalization of desired Cholesterol levels
- NSC-100 Extra Strength Immunity contributes to enhanced immune cell potentiation and in turn production of nitric oxide essential to killing of unwanted microbes
- Nutritionally beneficial for removal of cellular debris, particularly in the liver and digestive tract
- Provides enhancement of emission of additional pancreatic enzymes for digestion by the macrophage cells
